2405 SE Creekview Drive
Ankeny, IA 50021

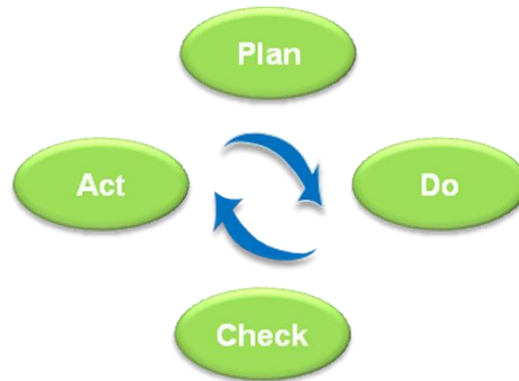

Time: 9:15 A.M. to 3:00 P.M.

Cost: \$80 (includes lunch)

Does your organization want to:

- reduce costs?
- reduce liability?
- improve market position?

We will show you how an EMS can benefit your organization!

In 2014, Pollution Prevention Services hosted a 1-day *“EMS In Depth: Aspects & Impacts and Rating Their Significance”* workshop for Iowa environmental professionals. Due to popular demand this workshop series continues and offers the next step in development of your environmental management system.

EMS In Depth: Objectives & Targets and Environmental Management Programs will be focused on two of the most challenging components of EMS - the development of your Objectives & Targets, as well as the resulting Environmental Management Programs that will reduce your environmental footprint. There will also be dedicated times for open dialogue and networking amongst attendees, to encourage the exchange of different ideas and approaches. Future workshops in the *EMS In Depth* series will focus on other identified portions of the EMS process and will also be based in part on attendee feedback and requests.

Leading the workshop will be Cory Sander of Sander Environmental Group, LLC. Cory has led our previous *EMS In Depth* workshops and has extensive experience developing, implementing, and maintaining ISO 14001 and other environmental management systems for numerous organizations including Honda, Ford, BNSF Railway, the City of Columbus, and Iowa DNR.
